VAPOR TRAILS

GERMANY, our premise is modern, for we are the youth who represent the dynamic neology of our America. We, like all young people, are the future, and it shall be one of change and innovation. But one thought will ever guide our quest for progress. It is the imposing realization that progress is made only with respect for the past, that all imagination, the newest of the new, contains something of before. And so we are fortunate because we are living in your country, a land alive with history. We must understand your culture, your concepts of value, your people. With these we will make an alliance of ideas that are bigger, better, brighter.
